## PERSONAL STATEMENT

My total experience in web development is 8+ years, and consists of a phased studying of technologies and languages. I started my career in IT as html/css coder, made page layout from PSD templates. Then I learned new languages and technologies to improve my skills, and did more complex tasks over time.

I worked on many different projects and made various tasks, such as html/css coding, writing templates for various template engines, creating themes for different CMS, writing plugins for JS libraries, extending and overriding libs, writing SPA (FE & BE parts), maintaining application deployment in a clouds service, writing JS components using Canvas, writing Chrome Browser extensions, writing Shell scripts to automate various process during development, development of landing pages, development features of CRM service, updating frameworks and libraries over the development time, providing migration for updated frameworks.

I have even written my own snake game, as one of my first coding experience, and published it on a famous IT resource. Now, from time to time, I work on my own pet-project. It's more of a hobby and it allows me to play with new technologies.

### Short description about my recent projects.

For two and a half years I worked as a front-end developer on [Clioonline](#) project as part of an agile scrum team. We were responsible for maintaining product: bugs fixing, developing new features, extending product for new localizations and locations, updating libs and frameworks, refactoring/rewriting old code, integration external services, cross subprojects interaction maintaining.

My responsibilities included work with product owner, designers, back-end developers, QA members and generally with other subprojects teams.

Next project was [ABC/Disney](#) - The American Broadcasting Company (ABC) is an American commercial broadcast television network that is a flagship property of Disney-ABC Television Group, a subsidiary of the Disney Media Networks division of The Walt Disney Company. My responsibility was to implement new features, maintain legacy code, refactoring, grooming stories and sprint planning, working with multiple teams, providing features DEMO, etc.

Then I worked as a full stack developer at [abcfincial](#) project – service which provides applications to manage fitness clubs work. There is software for Check-in and handle club members and staff, to provide members schedule and payments, integration with third party services, etc.

My responsibilities include writing features, bugs fixing, grooming and improving stories by discussing with PO/BA/QA/developers, code refactoring, etc.

My current project is [fleetonomy](#). Official description: Fleetonomy provides artificial intelligence-based solutions to enable fleet owners, auto manufacturers and mobility service providers to maximize their fleets by enhancing efficiency, generating more insights from their data, and creating new revenue streams.

I work as Senior Frontend Developer on 'Dashboard' - part of project which represents admin (back office) side of project ecosystem. Where user can manage company's fleet and drivers, read-create-update-check statistic, manage rides and prebooks, manage payments, handle other related stuff.

My responsibilities include implementing new features, bugs fixing, code refactoring, closely work with maps, etc.

## PROFESSIONAL SKILLS AND KNOWLEDGE

JavaScript, HTML, CSS, GIT, NPM, NodeJS, jQuery, jQuery UI, Backbone, MarionetteJS, Underscore, ExpressJS, SocketIO, WebSocket, Handlebars, Webpack, Grunt, Gulp, SASS, Bootstrap, Foundation, Stylelint, ESLint, PM2, React, Redux, Redux-thunk, Redux-form, Reselect, TypeScript, React-Apollo, etc.

*Familiar with:* MongoDB, Mongoose, Bash/Shell, PHP, MySQL, Angular, GraphQL (client side), Docker.

Platforms and tools: Windows, Ubuntu, MacOS, PhpStorm, Photoshop, phpMyAdmin, Sequel pro, Robo 3T, Source Tree, Jira, Jenkins, Heroku, etc.

Clear understanding of Object Oriented Programming, Semantics, Design Patterns, CRUD, REST etc.

Link for the my github <https://github.com/devalf> to see the code samples.

## WORK EXPERIENCE

### Gemicle

November 2018 – now

The Fleetonomy project. I work here as Frontend developer. Our team consist of 10 teammates. My responsibilities are: implementing new features, bugs fixing, code review, code refactoring, tasks estimation, etc.

Technologies stack: React, Redux, Reselect, React-Bootstrap, Redux-Form, CSS/SASS, Git, Webpack, React-Apollo (GraphQL), Mapbox-GL, Plotly.JS, D3-Request, Jest, Puppeteer, Enzyme, TypeScript, etc.

### Exadel

November 2017 – November 2018

The ABC/Disney and “abcfinancial” projects. On both projects I worked as full stack developer. The biggest size of our team was above 50 persons. My responsibilities were: support product, code refactoring, implementing features. We developed the project for “abcfinancial” from scratch.

Technologies stack: HTML, CSS, SASS, PHP, Phalcon, JS, jQuery, Backbone.JS, Shell; Node.js, React, Redux, Reselect, Redux-form, Redux-persist, Redux-thunk, TypeScript, Jest, Stylus, Git, Webpack, etc.

## **Ciklum**

May 2015 – October 2017

On the Clionline project I worked as a frontend developer. The biggest size of our team was above 30 persons. My responsibilities were: support product, code refactoring, implementing features, bugs fixing, creation jira tickets, for development and for bugs reporting. Tasks grooming/estimation.

Technologies stack: HTML, CSS, JS, jQuery, jQueryUI, Backbone.JS, Marionette.JS, SASS, Handlebars, Git, Grunt, various open source packages and tools.

## **Freelance**

March 2014 – May 2015

Different kinds of work. Mostly short terms task (up to 1 week). Frontend-, backend development.

Technologies stack: HTML, CSS, PHP, JS, jQuery, MySQL.

## **Adonweb** (office work, remote work)

August 2012 – March 2014

Html/css coding, frontend-, backend programming, database development. I worked as a junior developer in small team consist of 5 persons. My responsibilities were: supporting legacy code, implementing new features, development landing pages from scratch, implementing corporate site engine API, etc..

Technologies stack: HTML, CSS, PSD-layouts, PHP, Smarty, JS, jQuery, MySQL.

## **Freelance**

November 2011 - August 2012

Different kinds of work. Mostly HTML/CSS coding. I worked as single developer, and as a team member in a 2-3 persons teams.

Technologies stack: HTML, CSS, PSD-layouts, Photoshop, PHP, jQuery.

## **Jobs not related to IT**

August 2008 - October 2011

## **EDUCATION**

September 2003 - June 2008

*Vinnytsia National Technical University*

- Faculty of "Cars and automobile economy." Diploma "specialist" qualification of Mechanical Engineer

## **LANGUAGES**

- English (upper-intermediate)
- Ukrainian

**Etc.**

33 years old, I don't smoke, married, have a child. I adore my profession and I'm enjoying while improving my professional skills. Paternity, traveling and snowboarding is my hobby.
